- Tiling in secondary bathrooms by large format porcelain tiles, with imitation to natural stone finish and limestone light color look, same as the flooring, with floor-to-ceiling tiles according to the design.  
In the main bathrooms and guest toilets, the tiling will also be large format porcelain tiles, floor to ceiling, black color with copper veins, polished finish, to emphasize specific elements.  
Other walls in the bathroom will be plaster finish and painted in white.
- The exterior of the private lift core is finished with large format porcelain tiles, black color with copper veins and polished finish.

## **EXTERIOR CARPENTRY:**

- For sliding doors giving access to trafficable terraces, reduced profile aluminum by 'SCHUCO' or similar, graphite finish, large height from floor to ceiling and with rail flooring, the lower profile is flush with the floor, with thermal break and 'silence' double glazing, with solar control, low emissivity and non-colored Polyvinyl Butyral layer.  
The sliding door from the living room to the terrace as well as the master bedroom one, counts with different possibilities of opening according to the customer's convenience in each moment.
  - Same sliding doors in the Interior Patio up to the height of the ground floor, with fixed windows on top of them, up to the height of the first floor.
-

- The rest of the doors and windows are aluminum by 'SCHUCO' or similar in a graphite finish, with thermal break and 'silence' double glazing with solar control, low emissivity and non-colored Polyvinyl Butyral layer.

## **INTERIOR CARPENTRY:**

- Pivot armored front door from floor to ceiling, large height and width, without flashing, finished in natural oak wood, exclusively designed for Vilas 12. Opening system using fingerprint recognition to control the opening by a security lock, concealed security hinges, anti-noise rubber, stainless fittings and designer handle finished in brushed copper color.
- Access door to the house from the garage through the private basement without flashing, finished in natural oak wood. Opening system using fingerprint recognition to control the opening by a security lock, concealed security hinges, anti-noise rubber, stainless fittings and designer handle finished in brushed copper color.
- Interior doors from floor to ceiling, large height without flashing, natural oak finish, matt brass color concealed hinges, magnetic lock, stainless fittings, and designer handle finished in brushed copper color.
- Decorative panels and/or mosaics in certain areas of the house, according to the design, including door jamb where appropriate.
- Dressing rooms for master bedrooms have been exclusively designed for Vilas 12, made of a light structure of aluminum profiles, laminated wood with textile or leather finish and folding smoked-glass (bronze finish) doors from floor to ceiling combined with metallized laminated wood doors according to design, with handles integrated into aluminum profiles. The design of the interior space has been carefully studied and is indirectly lit with LED lighting, fully fitted with accessories imitating leather or textile and a design that aims to foster the feeling of lightness and the weightlessness of the elements.

The remaining wardrobes in the house, also customized for Vilas 12, are made of metallized laminated wood with handles integrated into aluminum profiles, combined with glass modules, where appropriate according to the design, from floor to ceiling, with interior modules fully finished in laminated wood and an exclusive modular design for interior accessories imitating leather or textile, including LED lighting to highlight certain spaces.

- Skirting throughout the house where appropriate in white lacquered wood 12 cm height and totally flush with the wall, including copper color profile.
-

## LIGHTING, SOUND, AND TELECOMMUNICATION:

- Special care has been paid to the study of the lighting in Vilas 12, combining various ambiances and smart home controls in accordance with the needs of each space. Similarly, the electrical junction boxes have been eliminated and all the electrical and telecommunication cabinets are concealed, having paid special attention to its position within the house.
- Two different types of lighting ambiances are created in the main rooms. One of them is made up of LED lighting with a diffusion panel for indirect and concealed lighting, located in different areas of the house to provide homogeneous and calm lighting. Depending on the room, for example in kitchens and bathrooms, LED lights are used to add subtlety on certain elements.

The aforementioned LED lighting is combined, where appropriate according to design, with a principal lighting system made of illumination rails flushed to the ceiling, that allows the combination of different dimmable lighting, all this combined with independent focal lighting, according to the design, to highlight certain areas and elements. The lighting by rails will allow the owner to the future customization of the different lighting elements, as well as to move them through the rail.

Both lighting systems can be controlled independently.

- 'GIRA' or similar mechanisms, using a main touch screen with glass finish located in the living room that allows the smart controlling of the lighting, air-conditioning, underfloor heating, energy consumption, sound, and access control.

The rest of the rooms are fitted with a 'GIRA' or similar smart keypad, glass finish, that can be configured to easily control the temperature and lighting ambiances.

All this can be controlled from the central screen located in the living room or from any fixed or mobile device with access to the internet/WiFi. Therefore, the entire house can be managed from anywhere in the world, making it possible to simulate day-to-day usage routines, adjust the temperature, program the house's lighting according to preset timetables, view the camera of the electronic entry phone, and more.

Fully digital automatic door opener by 'GIRA' or similar in main the access of the complex connected to the smart system of each house.

- Sound system built-in to the ceiling or wall, SONANCE or similar, with room control from the centralized screen in the living room or from any device with access to the internet/WiFi. It produces an incredible sound and can play the music from your mobile device.
  - Distributed WiFi repeater to provide full coverage throughout the house.
  - Telephone and television sockets in all the bedrooms and living room.
-

- Aiming to emphasise the continuity of the inside and the outside, also the same focal lighting system as in the house is fitted in the terraces. All this is also controlled by the smart system.
- Cinema on the terrace-solarium by means of a projector in a waterproof box and built-in wall speakers. The projection is done on a screen made on-site that offers a unique experience making possible to enjoy an outdoor cinema at home next to the private pool.

#### **PLUMBING:**

- The entire hot and cold-water installation is executed in accordance with current regulations, with first quality pipework for cold water and heat-insulated pipework for hot water, with partial flow shut-off valves in each wet room and individualized for each device.
- Centralized air source heat pump for the production of domestic hot water and underfloor heating, providing the maximum energy efficiency.

#### **AIR-CONDITIONING/UNDER FLOOR HEATING:**

- Hot and cold air-conditioning in the living room and bedrooms by means of ducting, including interior and exterior unit, Inverter, with individualized system per rooms incorporated into the smart home controls. Linear grilles flushed with the ceiling or wall, according to the technical needs of each area, in order to combine the aesthetic side with the technical performance.
- Underfloor heating throughout the house, except in the private basement, using hot water piping and panel mounting that boost the sound proofing of the house.

#### **BATHROOMS:**

- Porcelain suspended toilets, black matt color in the guest toilet and white color in the rest of the bathrooms, by "GESSI" or similar, soft close, with concealed cistern and front double flush actuation by "GESSI" or similar brushed copper finish or black finish, where appropriate, depending on the bathroom.
  - In master bathroom, according to design, free-standing Cristalplant or similar bathtub (technologically advanced composite material, non-absorbent, hypoallergenic and non-toxic, 100% recyclable, fireproof, hygienic, resistant and pleasant to the touch due to its smooth finish similar to natural stone) by "GESSI" or similar, with an almost sculptural design.
  - Floating shower tray fully flush with the house's flooring, made of the same porcelain material as the house's flooring, non-slip finish, rectangular format and drainage thorough the joints. The size of the showers to be according to the requirements of the design.
-

- In the master bathroom, stainless-steel sinks brushed copper finish by "GESSI" or similar on a veined black countertop, with double sinks according to design, combined with horizontal shelving and drawers veined black finish.

In the guest toilet, free-standing sink by "GESSI" or similar, with a circular stainless-steel matt black finish bowl.

The rest of the sinks are matt black finish stainless-steel by "GESSI" or similar, according to the design, on a matt white countertop, with suspended cabinet or shelves with matt white or wood finish where appropriate.

- Steel taps by "GESSI" or similar, carved "Brushed Copper" or "Matt Black" finish depending on the design, thermostatic ones in showers and recessed on the counter, wall, or free-standing, where appropriate.
- Shower head customized by "GESSI" or similar for Vilas12, flush with the ceiling in the style of 'RainShower' with rainwater, spray, and chromotherapy functions.
- Fixed glass shower screen bronze finish in showers and other WC spaces where appropriate according to the design.
- Mirror in bathrooms and guest toilet with a design tailored to each space and with LED lighting where appropriate according to the design.

#### **KITCHEN:**

- Kitchens are high-end personalized and adapted to the design and materials of Vilas12, with waterproof surfaces, finish up to the ceiling where appropriate according to design, melamine natural oak finish, integrated handle or push-up system where appropriate and impact-resistant edges. The baseboard is smooth aluminum graphite color finish, cutting-edge fittings, soft-close hinges and concealed shelf supports.
- Drawers and furnishings made with graphite interior structure, fully equipped with accessories and concealed electrical outlets, where appropriate.
- Counter, side supports and lateral panels (as the case may be depending on the design) in porcelain, black natural stone finish with slightly coppery veins.
- Front paneling to counter made of large format porcelain, with imitation to natural stone finish and limestone light color look, according to the design, including LED lighting to light the mentioned front paneling.

#### **HOUSEHOLD APPLIANCES:**

- High-end household appliances with integrated design and highly energy efficient, made up of the following elements:
    - Induction hob by "Bora" or similar which incorporates an extraction system by carbon filters, completely integrated into the kitchen island.
-

- “Gaggenau” or similar oven with microwave with intuitive Touch and automatic programs.
- “Gaggenau” or similar steam oven for professional-level cuisine.
- “Miele” or similar wine fridge, for the most demanding wine lovers.
- Plate warmer by “Gaggenau” or similar
- “Gaggenau” or similar vacuum sealer.
- “Gaggenau” or similar integrated refrigerator.
- “Gaggenau” or similar integrated freezer.
- Designer removable mixer tap copper-colored by “GESSI” or similar.
- “Gaggenau” or similar integrated dishwasher.
- “Gaggenau” or similar washing machine, located in the laundry room of the private basement.
- “Gaggenau” or similar dryer, located in the laundry room of the private basement.

#### **PAINT:**

- The exterior finished with waterproofing outdoor white paint, according to the design.
- The interior walls and ceilings are painted with smooth white plastic paint, except for the guest toilets which will be black paint.
